File list

Supply_Demand_Mismatch_Community_Districts.csv

Description

Supply_Demand_Mismatch_Community_Districts.csv – a summary .csv file with the supply, demand and mismatch values for each ecosystem service, at the community district level. Each attribute is followed by a suffix indicating the ecosystem service (APNO2 – air purification of NO2, APO3 – air purification of O3, RUNOFF – runoff mitigation, TEMP – local temperature regulation).

The following fields are provided:

- COMMUNITY DISTRICT: A coded identifier that allows to join this dataset to a community districts shapefile available at <https://data.cityofnewyork.us/City-Government/Community-Districts/yfnk-k7r4>
 - SUPPLY_**: Mean supply value per Community District.
 - DEMAND_**: Mean demand value per Community District.
 - MISMATCH_**: Mismatch between mean supply and demand values.
-
